- Converts a DVI-D signal into a DisplayPort Signal
- Supports resolutions up to 1920x1200p 60Hz
- Plug & Play - simple to install and use
- Low power, can be powered by DVI-D or USB

This adapter cable accepts video signals via DVI-D input and converts it into a DisplayPort signal. This allows DVI-D equipped workstations or PCâ€™s to be connected to modern DisplayPort monitors, with support for DVI-D single link resolutions up to 1200p 60Hz (1920x1200).

Due to its lower power design the converter can typically be powered directly from a PCâ€™s DVI-D port, in cases where the power output of the DVI-D port is insufficient (lower than 450mW) the integrated USB cable can be connected to a USB port or USB power supply to power the converter.
